

## SOLID WASTE FUND

This fund is used to account for the operations of the convenience sites and the landfill. The County operates eight convenience sites at the following locations:

Airport	Car Farm Road
Landfill	Northbrook
Optimist Club Road	Owl's Den
Tin Mine Road	Webb's Road

These centers collect household garbage, but also provide for recycling by allowing for corrugated cardboard, glass bottles, plastics, scrap metals, used motor oil, tires, and other materials to be source separated, then sold to recycling companies. The household garbage is trucked to the County's landfill. The recyclables are separately brought to the landfill, where they are baled or stored, and then removed by the contracted recycling companies for the materials. Some recyclables are picked up at the convenience sites by the recycling company. All the sites are manned during all hours of operation.

The landfill is an EPA-approved Subtitle D facility, fully lined with a rubber membrane, a leachate collection system, and monitoring wells. Leachate is the rainwater that seeps through the ground of the landfill, then collects in the bottom of the lined landfill. It must be removed and treated at a wastewater treatment plant, as it gets mixed with chemicals that have been discarded in the landfill. This protects the surrounding groundwater from contamination. The landfill must meet stringent federal and state environmental regulations regarding proper disposal, including daily cover of the garbage that is compacted in the open cell.

This operation is financed principally by two revenue sources. First, every improved parcel in Lincoln County is currently billed annually an \$86.00 availability fee for use of the landfill and the convenience sites. Citizens are mailed a decal to place in the window of a vehicle showing that they are from Lincoln County, and can use these facilities. This has become necessary to keep out-of-county residents from bringing in their garbage from other counties.

The second source of revenue is the tipping fee of \$32.00 per ton charged to those companies that haul garbage to the landfill. Citizens that use a private collection service can apply for a waiver of the \$86.00 availability fee if they show evidence of a contract for garbage collection where the waste is disposed of outside Lincoln County. This is because the private collection firm is paying tipping charges per ton at the landfill, and charging the property owner for this as part of the monthly bill for collection.

The County does not charge the City of Lincoln for disposal of its waste in the landfill. In exchange, the City of Lincoln accepts and treats the leachate collected from the landfill.

*Revised April 2016*

## NOTES:

The biggest issues this fund faces is affording replacement equipment, the new cell to be opened at the landfill, a new convenience site to be constructed on Optimist Club Road, and the post closure deficit. As you can see by the debt service schedule and the capital improvements plan for this fund, we will need to enter into installment purchase contracts in order to finance these large purchases over several years. Considering the amount of projected debt over the next few years, I recommend the Availability fee be increased from \$86.00 to \$99.00 per year. I am also recommending a tipping fees be increased by 8%. Based on the current number of improved parcels, the \$13.00 increase is expected to be sufficient to cover the additional debt incurred for several years.

The Non-Federal Restricted revenue is the \$2.00 state fee for tire disposal.

Special Contract Services is to pay the company to remove our used tires.

The capital outlay for this fund is shown below the operating budget. A 6-year CIP Fund follows the operating budget.
